SITE CHECKED

18 August 2026

Internal — for the Big Brain Way team. Sourced from the ratified BBWOPS catalog and reconciled against the live bigbrainway.com site. Not for distribution outside the firm.

WHAT WE ARE

An AI consultancy and brand engineering firm — not a marketing agency

Big Brain Way builds permanent digital assets and decision capacity for business owners. We are asset-based, not numbers-based: we build permanent, ownable things rather than rent attention or sell reports.

Big Brain Way is the trading name of **Que Dot Inc.**, owned and operated by **Mansoor Qureshi**. The firm works fully remotely, with its market focus on **Canada**.

The "not a marketing agency" line is not positioning garnish — it governs how we sell and what we promise. Say it plainly when a prospect tries to slot us next to their last SEO vendor.

How the public site says it

Client-facing language on **bigbrainway.com**, useful when a prospect quotes it back at you:

- Hero: "Engineer Your Brand — AI & Human Intelligence Integrated As One."

- Framing question: *"How would your business change if your systems thought for themselves and were data-driven?"*
- Positioning: *"Not Just an Agency — We're Your Growth Partner."*
- Mission: to *"democratize AI-driven marketing and make enterprise-grade tools and automation accessible to businesses of all sizes" — "Leveling the Playing Field for Every Business."*

The operating promise

- **Asset-based.** We build things the client owns.
- **Light on reporting.** By design — we do not substitute dashboards for delivery.
- **Remote.** The whole firm.
- **The asset is the proof.** Clients see and own everything we build, and keep it if we ever part ways.

We minimise guarantees because we do not sell numbers — we sell the permanent assets that produce them. The documented exceptions are the finance-door outcome guarantee, Baseline-or-Walk, and the published 30-day satisfaction guarantee.

THE DIFFERENTIATOR

Machine-to-machine discovery is the gap almost nobody else is engineering for

Discovery is shifting from human-to-human to machine-to-machine. AI engines, assistants and crawlers now read, catalog and recommend brands directly.

Most providers still make content only for humans. Almost no one engineers small and mid-sized business brands to be *machine-readable*. That gap is Big Brain Way's edge, and it is what future-proofs a client.

Compare us not against an SEO vendor at \$500/mo, but against a fractional CMO plus an AI consulting team at \$5K–\$12K/mo.

That is the substitute we provide, at SMB scale. Use it as the anchor when a

prospect calls us expensive — anchor against the real alternative first, then ask what would have to be true for this to be worth it. Do not disparage other vendors.

THE FIRM

Who is behind the work

Named leadership is public on the site; the rest of the bench is described by function rather than by name.

ROLE	PERSON
CEO & Founder	Mansoor Qureshi
CTO	Khalid Qureshi, M.Eng, P.Eng
Operations lead · QA head · AI engineers · content specialists · governance expert	Named internally, not on the public site
Production bench	Brand-engineering lead, web-engineering lead, content and SEO lead, developers, data analysts, Canva design team

Clients whose logos we display publicly

These appear on the homepage, so they are safe to name on a call. Anything beyond the logo — results, scope, spend — is not public; check before you say it.

TIRW	Kent Motels	Ontario Centrist Party	QIF	CanStrive	El Gourmet
------	-------------	------------------------	-----	-----------	------------

CAPABILITY

Nine domains — the outward answer to "what can you actually do?"

This is the sellable surface. If a request does not map to one of these nine, we do not claim it.

#	DOMAIN	WHAT WE CAN DO
1	Brand Engineering	Brand identity built from scratch; narrative and positioning; the connected "brand fabric" of touch-points; voice and tone systems

2	AI & Machine-to-Machine	AI Capability Layer trained on the client's business, competitors, market and domain; machine-readability (schema, llms.txt, structured content); multimodal discoverability across VSO, AEO and GEO; AI-search citation engineering
3	Web Engineering	Website build and ownership as primary vendor of record; conversion hubs; WordPress and Divi; performance and Core Web Vitals; analytics and conversion tracking
4	Content Production	AI-generated video (reality-mixed: client footage plus AI); content fabric of pillars and derivatives; Google Business Profile management; social content
5	Owned Channels	Email list activation, nurture and re-engagement; WhatsApp Business automations
6	Premium Experiences	Experience design rather than discounting; digital signage, custom event feeds, themed nights, classes, chef's-table packaging and the assets that sell them
7	Paid Acquisition	Google and Meta ads, layered on a dense organic base — management, not markup
8	Data, BI & Finance	Financial Health Audit; Fractional CFO and BI dashboards; analyst capacity
9	Custom AI Engineering	Per-client AI assistants (booking, menu, catering bots); automations; knowledge systems

SCOPE BOUNDARY — SAY IT PLAINLY

We do **no on-site shoots**. The client captures footage; we generate the finished content from it. State this early when video comes up. It is a scope boundary, not something to talk around.

REACH

Who we sell to, and how they reach us

The public site describes the audience as "*startups, local businesses, consultants, e-commerce brands, and growth-minded founders who want better systems and stronger visibility.*"

Verticals named publicly: **healthcare** (a dedicated Pro Services line), **local services and shops, B2B consulting, and e-commerce**. Market focus is Canada.

Public contact points

- **WhatsApp:** +1 437-800-0733
- **Web:** bigbrainway.com — </contact/>, </ai-audit-form/>, </concierge/>, </careers/>, </bbw-blog/>
- **Social:** LinkedIn, Instagram, Facebook, WhatsApp
- **Policies:** </privacy-policy/>, </terms-of-service-bigbrainway/>, </guarantee/>

CLAIMS DISCIPLINE

What we will not say, whoever is asking

We sell assets, not promised numbers. A confident claim built on no evidence is how a seller gets caught, and the correction always costs more than the caution would have.

- **Never invent or estimate an outcome.** No traffic numbers, no ranking promises, no revenue projections, no timelines to result.
- **Never state a guarantee beyond the documented three** — the finance-door outcome guarantee, Baseline-or-Walk, and the published 30-day satisfaction guarantee. Quote them as written; do not paraphrase them into something stronger.
- **Never claim a capability outside the nine domains.**
- **Where research has not run, state the discovery question, not the claim.** Mark it unearned rather than dressing it up.

"I don't have that detail — let me get you someone who does" is always a correct answer.

UNRESOLVED — THE SITE CARRIES PERFORMANCE CLAIMS WE DO NOT STAND BEHIND

bigbrainway.com currently publishes "**3x Traffic Lift**", "**2.5x Conv. Rate**", "**+24% Conversion**", "**40+ Hrs Saved/Wk**", "**3x average ROI**", "**4x content output, 50% lower CPL**" and "**10+ hours per week**" reclaimed.

These are exactly the outcome claims the Banned-Claims discipline tells sellers never to make. **Do not repeat them on a call or in a proposal** unless you can evidence the specific number for the specific client. Either the site needs substantiation attached or the claims need pulling — that decision sits with Mansoor.

Sources: `BBW-Capabilities.md` (2026-06-22); the ratified seller catalog (`catalog.json` v1, category line and positioning anchor), 2026-07-18; and `bigbrainway.com` — homepage, `/about-big-brain-way/` and `/faq/` — read 18 August 2026.
